SKILLS

Networking

BGP OSPF IS-IS
MPLS MP-BGP
SD-WAN VPN VLAN
L2/L3 Design

Cloud & Virtualization

Cisco HyperFlex
Cisco UCS
VMware vCenter
VMware ESXi
Private Cloud
MicroCloud

Data Center

Cisco ACI UCS Manager
FWaaS

Security

Cisco FTD ASA FMC
FortiGate

Smart City & IoT

AI VMS Eocortex
Scylla AI IoT
GPU Infra

Monitoring & Voice

Zabbix SNMP Cacti
Cloud PBX VoIP
SIP Trunking

LANGUAGES

English

EDUCATION

B.A. English

Mandalay University, 2011–
2016

PROFESSIONAL SUMMARY

Senior Network, Cloud & Infrastructure Engineer with 13+ years of experience across ISP, system integrator, private cloud, and Smart City environments. Expert in Cisco HyperFlex (HCI), VMware vCenter, Cisco UCS, Cisco ACI, and MicroCloud. Proven success designing, deploying, and operating large-scale, high-availability networks and Smart City platforms integrating video surveillance, IoT, and AI analytics.

EXPERIENCE

Network & Solution Engineer

Jun 2024 – Present

Planetcomm / Planetcloud, Bangkok, Thailand

- Designed and operated Cisco HyperFlex HCI and UCS-based private cloud environments
- Managed virtualization infrastructure using VMware vCenter and automated provisioning workflows
- Implemented MicroCloud environments for rapid POC and edge deployments
- Engineered multi-tenant network architecture (VLANs, VPNs, firewalls, routing) ensuring isolation and scalability
- Applied Cisco ACI for policy-driven data center networking
- Delivered Smart City network solutions integrating video surveillance, IoT, and central management
- Designed and implemented SPDC Data Center and FWaaS solutions

Senior Core Network Engineer

Dec 2011 – Jun 2024

Global Technology Co., Ltd., Myanmar

- Operated nationwide ISP core network infrastructure supporting millions of users
- Designed and implemented IP Transit, MPLS VPN, FTTH, DIA, and WAN services
- Led L2/L3 escalation response for critical nationwide network outages
- Built International Gateway networks with eBGP/iBGP peering and global CDNs (Google, Facebook, Netflix)
- Deployed MPLS core network using IS-IS, MP-BGP, TE, and QoS
- Conducted capacity planning and 160G–400G backbone upgrades
- Expanded POP sites and multi-service platforms for high availability and redundancy

Smart City & AI Platform Projects

2018 – Present

Various Projects

- Designed Smart City network infrastructure for urban surveillance and IoT integration
- Deployed AI VMS (Eocortex, Scylla AI) with facial recognition, object detection, and analytics
- Architected GPU-enabled edge and data center environments for real-time AI inference
- Built secure, high-availability connectivity between edge devices, data centers, and private clouds

CERTIFICATIONS & TRAINING

- **Cisco Certified Specialist – ENARSI** — Cisco Certified
- **CCIE Service Provider** — Training
- **Cisco HyperFlex (HCI)** — Training
- **Cisco ACI** — Training
- **VMware vCenter / ESXi** — Training
- **FortiGate Security** — Training
- **Cisco FTD / ASA / FMC** — Training
- **Eocortex AI VMS** — Training

HANDS-ON EQUIPMENT

Cisco ASR9K, NCS 5500/6000, Juniper MX, Nexus 9K/7K/5K/2K, Catalyst 9K, UCS B/C-Series, HyperFlex HX-Series, VMware vCenter, Cisco FMC/FTD/ASA, FortiGate, MikroTik, Zabbix
