yannaingkyaw.github.io/portfolio | Bangkok, Thailand

SKILLS

Routing & Switching

BGP OSPF IS-IS
MP-BGP L2/L3 Design
VLAN STP

MPLS & WAN

MPLS MPLS VPN
Traffic Engineering QoS
SD-WAN VPN IP Transit

Service Provider

FTTH DIA IGW
eBGP/iBGP CDN Peering
Capacity Planning

Security

Cisco FTD ASA FMC
FortiGate

Data Center

Cisco ACI Nexus UCS
FWaaS

Monitoring & Voice

Zabbix SNMP Cacti
VoIP / SIP

LANGUAGES

English

Professional Working

Burmese

EDUCATION

B.A. English

Mandalay University, 2011–2016

PROFESSIONAL SUMMARY

Senior Network Engineer with 13+ years of experience in ISP core networks, routing protocols, MPLS, and service provider infrastructure. Specialized in BGP/OSPF/IS-IS, MPLS VPN, data center networking, and large-scale network design. Proven track record operating nationwide backbone networks and leading critical escalation response.

EXPERIENCE

Network & Solution Engineer

Jun 2024 – Present

Planetcomm / Planetcloud, Bangkok, Thailand

- Engineered multi-tenant network architecture (VLANs, VPNs, firewalls, routing) ensuring isolation and scalability
- Applied Cisco ACI for policy-driven data center networking
- Delivered Smart City network solutions integrating video surveillance, IoT, and central management
- Designed and implemented SPDC Data Center and FWaaS firewall solutions
- Collaborated with cross-vendor teams for integrated network and infrastructure deployments

Senior Core Network Engineer

Dec 2011 – Jun 2024

Global Technology Co., Ltd., Myanmar

- Operated nationwide ISP core network infrastructure supporting millions of users
- Designed and implemented IP Transit, MPLS VPN, FTTH, DIA, and WAN services
- Led L2/L3 escalation response for critical nationwide network outages
- Built International Gateway networks with eBGP/iBGP peering and global CDNs (Google, Facebook, Netflix)
- Deployed MPLS core network using IS-IS, MP-BGP, Traffic Engineering, and QoS
- Conducted capacity planning and 160G–400G backbone upgrades
- Expanded POP sites and multi-service platforms for high availability and redundancy

Smart City & Network Projects

2018 – Present

Various Projects

- Designed Smart City network infrastructure for urban surveillance and IoT integration
- Built secure, high-availability connectivity between edge devices, data centers, and private clouds

CERTIFICATIONS & TRAINING

- Cisco Certified Specialist – ENARSI Cisco Certified
- CCIE Service Provider Training
- CCIE Enterprise Infrastructure Training
- CCNP Routing & Switching Training
